

LEDGER DESK

Ledger Desk is software designed for SME's to manage all the accounting needs of their business. It contains HR, Payroll, and attendance Modules with integrated ERP that can be linked to Bio-metric Devices.

KEY FEATURES:

- ▶ Single application for managing all aspects of a purchase order including costs and revenue
- ▶ Offers access to customers/vendors and other stakeholders data on a single platform
- ▶ Let's you create different login users, each with a different set of access rights
- ▶ Provides end to end visibility of the entire ordering to Cash process
- ▶ Ensures data accuracy by displaying purchase orders with both your own product names and the vendor's Product names
- ▶ Extensive reporting capability to capture customer, vendor and financial performance
